MISCELLANEOUS

1. At the following stations freight trains descending grade between Caliente and Lang will stop 10 minutes to allow heat to equalize in wheels and to permit train inspection.

Marcel.—(Unless stop made at Cable.)

Woodford.—(Unless stop made at Walong.)

Bealville.—(Unless stop made at Rowen.)

When stop of ten minutes has been made at Rowen it will be necessary to allow stop of ten minutes for equalizing wheel heat and inspection at some station between Rowen and Caliente.

Warren.—(Pull down to a position on straight track.)

Ravenna.—(Unless stop made at Paris or Acton.)

Russ.—(Unless stop made at Ravenna.)

McKittrick Branch.—Between mile posts 357 and 358.

Owenyo Branch.—At Little Lake, Teagle and Goler.

2. Freight trains taking siding where it is necessary for them to open their own switch, and where necessary to apply train (automatic) brakes, stop and allow sufficient time to insure release of all brakes—one to one and one-half minutes is usually required for this purpose. Be governed by gauge and time duration in this operation.

3. Conductor report to Superintendent, by wire, any failure to properly control train by air brakes and deliver to Car Inspector at first terminal list showing tonnage of each car in train. Car Inspector will add to list the piston travel of each car in train, as shown by test made before road engine is cut off, also result of three-minute test of all retainers. The list will then be forwarded to Superintendent by first mail.

4. The maximum tonnage per operative brake between Caliente and Mojave is 115 Ms and between Mojave and Saugus 120 Ms.

5. **Retainers** will be used on passenger trains as follows:

Eastward trains	Cameron to Mojave—All retainers
Eastward trains	Vincent to Acton—Available retainers
Westward trains	Vincent to Harold—Available retainers
Westward trains	Tehachapi to Caliente—All retainers

On trains having not to exceed two head end cars available retainers will be used Cameron to Mojave and Tehachapi to Caliente.

Retainers will be used on freight trains as follows:

Eastward trains	Cameron to Mojave
Eastward trains	Vincent to Lang
Westward trains	Vincent to Harold
Westward trains	Tehachapi to Caliente
Westward trains	Caliente to Ilmon; first ten available retainers from head end.
Westward trains	McKittrick to Lokern
Westward trains	Mabel to Linnie
Westward trains	Searles to Garlock

Retainers will be used on other districts when in judgment of enginemen it is deemed necessary.

Where retainers are used the rate of speed of freight trains on any grade of over one per cent will not exceed 25 miles per hour, and on grades of this character MORE THAN FIVE MILES LONG, FOR THE FIRST FIVE MILES THE TIME CONSUMED IN TRAVELING ONE MILE SHALL NOT BE LESS THAN THREE MINUTES. The above maximum speed restriction will not affect the speed on heavier grades and other locations, where the maximum is now provided. Retainers on eastward freight trains entering Mojave must not be turned down until train comes to rest on designated tracks.

6. Rear brakeman will open valve on rear of steam heat line and valve must be closed on engine at yard limit boards—Fresno, Bakersfield and Mojave. At other points: Station one mile board. Exception, Mojave trains not requiring disconnection of train line.

7. Helpers will cut out at Vincent unless otherwise instructed.

Helpers cut out at Summit Switch and ordered through to Mojave will precede train from Summit Switch, unless otherwise instructed.

Helper engines cutting out of eastward trains at Summit Switch, enter wye from east leg.

In taking water on freight trains with helper cut in, train will be cut ahead of first helper from head end and will back to point where it is to take water. After stopping, train will be cut ahead of following helper.

Should a stop be made short of a turnout at a point where helpers are to be cut out, cut will be made ahead of leading helper and train engine will pull head portion to clear, to prevent damage done by helper in shoving during short move.

In movement of light engines between Bakersfield and Mojave the number of engines coupled is restricted to four.

Westward freight trains will stop east of crossover Summit Switch to make plug test.

8. **Fresno.**—Eastward trains entering yard will be governed by signal from Herder as follows:

Trains via Merced, green signal.
Trains via Kerman, yellow signal.

Trains entering or leaving through passenger station tracks designated below will not pass Merced or Kern Streets without signal from Yardmen.

Main Line Depot No. 1.
Depot No. 2.
Depot No. 3.
Depot No. 4.
Back Lead.

Mojave.—Trains entering or leaving west end of yards be governed by following hand signals:

Westward	Green signals.
Eastward	Yellow signals.

Trains entering or leaving east end of yard be governed by following hand signals:

Southern Pacific	Yellow signals.
Santa Fe	Green signals.

Trains from Owenyo Branch stop before fouling main track, regardless of position of derailer or signals received.

Following code of signals will govern eastward trains entering yard:

Southern Pacific:

Passenger trains	One long.
Freight trains	One short, one long, one short.

Santa Fe:

Passenger trains	One long, one short.
Freight trains	One long, one short, one long.

9. **Fresno.**—Trains from Friant Branch and Sanger Branch stop at "stop" board at junction of these lines.

Goshen Jct.—Trains from Visalia Branch stop at "stop" board east end of yard.

Exeter.—Eastward trains stop at "stop" board at junction with Porterville Branch.

10. At least two loaded steel underframe cars must be placed immediately ahead of 2-10-2 type engines that are engaged in helping.

11. **Goshen Jct.**—End of the Visalia Branch will be at first switch east of the station where it enters Bakersfield-Fresno main track.

12. At Caliente, Bealville and Marcel siding next to main track will be known as eastward siding; back track will be known as westward siding.

13. At Rowen, siding between intermediate switches is designated as middle siding.

Siding east of middle siding is designated as westward siding.
Siding west of middle siding is designated as eastward siding.
